

# Systematic Use of Data to Improve Student Learning

## Vermont State University at Castleton

STARTING  
October 11

This **FREE course** is designed for educator teams and their leadership to build an insightful data-use culture, where all teachers and administrators regularly and collaboratively leverage a variety of assessments to improve student learning and teacher practices.

**Participants: K - 12 teaching teams**  
Max: 10 teams of 4 - 6 per section

**4-course modules** organized around central questions

**2 hours of asynchronous learning weekly**

**3 CREDIT  
OPTION  
for \$450**

### Course Goals:

**Determine** what questions emerge from different data sources and how they can shed light on learners and their obstacles.

**Explore** how balanced assessment systems can inform teaching and improve learning.

**Understand** the school, district, and state-level systems that lead to sustained, effective, and collaborative response to student assessment data.

**Plan** systems and routines for your team or building to ensure a consistent and effective approach to assessment data.

### Course Dates:

#### 3 six-hour, in-person sessions:
