ESP
Education Success Platform

ESP is a flexible, cloud-based system that facilitates accurate and complete data collection for educational purposes through the creation and integration of customizable forms and surveys. The system streamlines the management of information essential to effective schools, districts, and state agencies by gathering data in one, easy-to-find place.

EASE · ACCURACY · INSIGHT

Customizable Forms

ESP's smart forms give you control and facilitate an ease of workflow by enabling multiple stakeholders to contribute to data collection. Here's some what ESP allows you to do:

- Create your own customized forms.
- Target your audience.
- Designate who can fill out parts of a form.
- Share forms easily and determine how data is recorded.
- Specify who certifies the completion of a data collection.

Accurate, Complete Data Collection

We understand that data is only as good as its accuracy and completeness. Here's how ESP supports successful data collection:

- Real-time status of completed forms.
- Scheduled reminders for incomplete forms.
- Embedded help documents and hover text that can be integrated with any form.

Integrated Data and Valuable Statistics

ESP makes it easy to access and analyze data. Here's how ESP does this:

- Provides a home to maintain, manage, and use data.
- Integrates school data, such as class rosters, directly into data collection forms.
- Facilitates the ease of data integration back into your data warehouse.
- Customizes data collection with just a few clicks to select audience.
- Summarizes data with statistics and graphs to facilitate discussion to target action.

ESP: Helping Educators Improve Education

Ready to Go!

ESP offers rubrics , forms, and surveys developed by content experts that can be customized for your specific purpose. Here are just a few examples:

- MTSS Request and Intervention Form
- Behavior Tracking Form
- Climate and Culture Survey
- Teacher Observation Form

ESP at Work

Using ESP, Deerfield Community School has created a behavior tracking collection system. The data tracks behavioral incidents by student, location, time of day, and type and seriousness of infraction. In addition, it captures information about the responses to student behavior.

Districts and Schools

ESP allows districts and schools to improve teaching and learning and operations, including: rubrics for student assessment, program evaluation, surveys to collect perception data , and forms for school safety, behavior, permissions and tracking.

66 ESP has made the process of data collection so much easier! What was once an IT-intensive process is now a simple administrative task. We love that we can design our own data collection, schedule when it goes out, set notifications and reminders, and let the system do the rest. And DS goes above and beyond to provide ESP support. 99

- Caitlin Davis, Director of Education & Analytical Resources, NHED

State Agencies

ESP facilitates the collection of a wide variety of data from schools, districts, institutional programs as well as other stakeholders around the state. It allows the state agencies to organize and manage their own data collections, without technical support.
