

YOU CAN HAVE IT ALL: MERGING RESEARCH, TEACHER EXPERTISE, AND CHILD-CENTERED LITERACY PRACTICES

Is literacy instruction causing you doubt, confusion, or overwhelm? **Join us to critically and constructively evaluate your teaching practices!**

You will have the opportunity to:

- Sort through the jargon and media bluster to build a clearer understanding of what you need to engage learners in the complex process of learning to read.
- Examine evolving, research-based models of reading development and components of a comprehensive literacy framework to identify characteristics of evidence-based, child-centered literacy practices.
- Evaluate current instructional methods, regardless of the curricular resources or pedagogical approach used in your district, to help decide what to keep, revise, add, or let go.
- Create an action plan and connect to resources that will support effective literacy instruction at your school.
